PRIORITY ISSUES

The ability of Solano County to serve its residents and provide for a thriving and sustainable community requires support from all levels of government. The State of California’s (State) actions and ongoing fiscal uncertainties continue to threaten the County’s ability to provide vital services to the public. In order to fulfill the County’s commitment to the community, State resources should be sought to support the County’s mission to enrich the quality of life in the County. To this end, the County Board of Supervisors supports the priorities and the legislative principles set forth below.

Priority issues are those that have a significant impact on County business and on which County staff, including the County’s State legislative advocates, will concentrate their legislative efforts during the 2017 Legislative Session. The County’s top priorities (Listed Alphabetically) include:

1. **Affordable Care Implementation** – Support healthcare policy implementation efforts that do not have an adverse financial impact to the County. Examples of impacts may include unfunded or under-funded mandates, or reallocation of existing County funding that result in an increased General Fund obligation. Support ongoing and new efforts related to increasing the number of insured persons and to providing and expanding primary care services and public health prevention services and activities.

2. **Children, Youth, and Families** - Support legislation and budget efforts that support children, youth, and families, including restoring and expanding quality child care and preschool opportunities, increasing funding for homeless youth, promoting safety for all children, and supporting mental and developmental health prevention and early intervention activities. Advocate for dedicated funding streams for child abuse and youth violence prevention efforts. Collaborate with state regional offices, schools and health care systems to expand resources for parents with special needs children.

3. **County Revenue Sources** - Oppose efforts to decrease, restrict, eliminate, seize, divert, supplant or otherwise restrict local autonomy of local revenues. Oppose any efforts at the state level to eliminate or redirect revenues currently dedicated to local government for state purposes to other agencies and/or districts. Advocate for timely, full state funding for state programs operated by the County, which include appropriate cost of living increases, as well as costs associated with increases in population and caseload growth.

4. **County Strategic Plan** - Support efforts that further the goals outlined in the County’s Strategic Plan as follows: (a) improve the health and well-being of those who live and work here; (b) ensure responsible and sustainable land use; (c) maintain a safe community; and (d) invest in and for the future.

5. **Environmental and Open Space** – Encourage and seek legislation that protects the County’s quality of life, its diverse natural resources, and preserves the essence and history of the County. Support funding and regulatory efforts to preserve open space and agricultural viability.

6. **Sacramento-San Joaquin Delta and Suisun Marsh** - Support legislative and administrative efforts to protect the Sacramento-San Joaquin Delta and County’s interests relative to land use, agricultural viability, economic development, police or emergency response mandates, environmental preservation, flood protection, levee stability, habitat conservation, recreation, water supply, water quality, and water rights. Support governance structures that give local government a strong and equal voice with other stakeholders in setting Delta policy, and in project development and implementation.

7. **State Realignment & Cost-Shifts** - Oppose proposals to restructure, realign, or otherwise shift the cost of state programs to local government, without commensurate compensation and a legislative ability for counties to draw down available federal funding. Support efforts to distribute public safety realignment funds using an equitable formula based on population. Support efforts to improve the stability of current
County revenue sources. Oppose any realignment initiatives, which fail to fully fund services shifted to the County.

8. **Voting and Election Efficiencies** - Support efforts to modernize election administration to increase voter turnout, reduce the local cost of elections, reduce waiting time at polling places, increase convenience for voters, and improve voting opportunity for overseas and military voters.

Furthermore, the Solano Board of Supervisors adopts the following legislative principles (Listed Alphabetically by Policy Area):

### Agriculture, Natural Resources, and Water

Solano County supports state legislative and regulatory actions that protect and enhance the County's significant agricultural, water, and natural resources. The County opposes any efforts to cut funding streams for critically important state resource programs. Specific principles include:

1. Support funding via the regulatory authority of the Agricultural Commissioner/Sealer of Weights and Measures, and extend sunsets where applicable, including a cost share from the livestock industry for USDA Wildlife Services. Oppose allowing industry self-certification of devices.
2. Support legislation or rulemaking to allow growers to take feral hogs without a depredation permit or hunting license when the hogs are damaging crops or agricultural infrastructure.
3. Support funding for an alternate intake to the North Bay Aqueduct.
4. Support efforts to protect the County's Farm Gate, including, but not limited to, full mitigation of agricultural and other economic impacts associated with habitat restoration efforts.
5. Support efforts to maintain local control/involvement in allocation of water resources.
6. Support an increase in California General Fund allocations to High Risk Pest Exclusion programs.
7. Support legislation that would authorize the Environmental Protection Agency to provide funding to state and local agencies for projects aimed at advancing the goals and objectives of the comprehensive conservation and management plan for the San Francisco estuary.

**SUMMARY**

In order to be eligible for state subsidized child care, families are required to meet eligibility requirements for income and need.

AB 273 clarifies English as a Second Language (ESL) and High School Equivalency (HSE) classes as an acceptable type of training course for families to qualify for child care eligibility under programs funded by the California Department of Education.

**BACKGROUND**

California’s Educational Code states that families who meet certain requirements are eligible for federal and state subsidized child development services, such as child care and preschool. The requirements to qualify are based on criteria including income and need of the family.

Under existing law, parents that meet income criteria and are engaged in vocational training courses leading directly to a trade or profession are eligible for state supported child care services. However, courses in English as a Second Language (ESL) and/or High School Equivalency Certificate (HSE) do not qualify as a type of vocational training under programs funded by the California Department of Education.

Parents that are taking classes to improve their English language proficiency or working to earn their HSE certificate are taking foundational steps needed to enter vocational training, but currently do not qualify for subsidized child care for their children.

Many families require state supported child care services in order to continue with their education and work towards a profession. Costly child care services may prove burdensome for lower income families, disproportionately impacting single mothers and women of color.

According to the California Budget & Policy Center, in 2015, the average single-mother could expect to spend over two-thirds of her income to cover the cost of child care.

EdSource, a policy and research nonprofit, reports that a lack of access to quality early learning experiences not only widens the achievement gap for children of color, but also contributes to the school-to-prison pipeline.

**This Bill**

AB 273 would add ESL and HSE educational programs to the list of eligibility criteria for state subsidized child development services under the California Educational Code.

This bill does not propose to add any additional slots into the child care system. It simply expands the criteria by which a family can qualify to apply.

This change will empower parents to increase their educational level by providing families with greater access to subsidized child care services. It is often challenging for families who are non-native English speakers to access medical services, educational support within school systems, and social services, despite laws that require interpretation. Investing in families as a whole helps reduce poverty and the associated effects on childhood development.

AB 273 would give low-income families greater access to subsidized childcare services by adding enrollment in English as a Second Language (ESL) and High School Equivalency (HSE) Certification Preparation courses to the existing eligibility requirements.
