TODAY'S AGENDA

- What is Solano Kids Thrive?
- Overview of ACEs
- Provide input to develop a Solano Resilience Strategic Plan

SOLANO KIDS THRIVE

County-wide collaborative of education, healthcare, non-profit, and government agencies working together toward sustaining and strengthening the overall Solano County early childhood system

Collective Impact Goals
- Safe Communities
- Healthy Families
- Family Self-Sufficiency
- School Readiness
WHAT IS CHILDHOOD TRAUMA?

"The experience of an event by a child that is emotionally painful or distressful, which often results in lasting mental and physical effects".

National Institute of Mental Health

ACE STUDY

- CDC and Kaiser Permanente study in Southern California from 1995-1997
- 17,300 Adult HMO members
- Tracked health outcomes based on childhood ACEs

THE SIGNIFICANCE OF ACES

#1 Public Health issue of a Generation

A person is just as likely to develop heart disease from ACEs as they are from high blood pressure, high cholesterol, or family history.
TEN ADVERSE CHILDHOOD EXPERIENCES

1. Child physical abuse
2. Child sexual abuse
3. Child emotional abuse
4. Physical neglect
5. Emotional neglect

ACE STUDY RESULTS

36% ZERO
9% ONE
16% TWO
13% THREE
26% FOUR OR MORE

TEN ADVERSE CHILDHOOD EXPERIENCES

6. Mental illness, depression, or suicidal person in the home
7. Drug addicted or alcoholic family member
8. Witness to domestic violence
9. Loss of a parent due to abandonment, divorce, or death
10. Incarceration of a family member
CONSEQUENCES OF ACES
A person who has had four or more ACEs is:
- 2 ½ times as likely to smoke
- 7 ½ times as likely to be dependent on alcohol
- 10 times as likely to use intravenous drugs

TYPES OF STRESS
POSITIVE STRESS
Mid to moderate and short
duration stress response
necessary for healthy
development.
Example: First day of School

TOLERABLE STRESS
More severe stress
response but limited in
duration which allows for
recovery.
Example: Loss of loved one

TOXIC STRESS
Extreme, frequent, or
extended activation of the
body's stress response
without the buffering
presence of a supportive
adult.

CONSEQUENCES OF ACES
Toxic Stress = Excessive, persistent stress that a
person's own system can't deal with any longer
- Brain and body development is altered
- Greater risk for health issues
- Long-term effects such as homelessness,
  prison time, or early death
The most common factor for children who develop resilience is to have at least one stable and committed relationship with an adult.
BECOMING TRAUMA-INFORMED

To be trauma informed is to make an effort to know the past and current traumas impacting those you work with, whether it’s a client, patient, student, or program participant.

*Begin conversations not by asking, “What’s wrong with you?”, but “What happened to you?”*

WHAT CAN YOU DO?

- **Individual:** Be a caring adult in a child’s life
- **Agency:** Develop trauma-informed practices
- **Community:** Create opportunities for participation and engagement of children and families
HELP US DEVELOP OUR SOLANO RESILIENCE STRATEGIC PLAN

How have you seen ACEs and resilience impact your work?
In thinking about ACEs and resilience, what should we consider as we begin to develop this strategic plan?
Are there other groups with whom we should be sharing this message?
How would you like to be informed on the progress of this work on an ongoing basis?
